SIRIUS position switches

Main advantages at a glance

- Reduced variance and stock-keeping costs due to modular design
- Plug-in design and a standardized interface simplify replacement and installation of the actuator heads
- All actuator heads can be rotated in 22.5° increments
- Quick-connect technology for plastic enclosures (31 mm) reduces mounting times by up to 25%
- Choice of connectors and rollers
- The entire ASIsafe electronics is integrated in a standard enclosure
- LED displays optionally available for all enclosures
- Higher degree of safety with redundant shutdown and additional signaling for versions with 3-pole contact blocks (enclosure dimensions as for 2-pole contact blocks)
- Versions with increased corrosion protection and for use down to -40 °C

The modular design of the standard position switches saves time and increases flexibility during installation of a whole range of switch versions.

Simple plug-in mounting

- 1 Open cover
- 2 Operate the locking lever
- 3 Replace the actuator head
- 4 Lock and close the cover

Quick-connect technology

- 1 Connect connection cable to terminals of contact block
- 2 Insert through slot into opening for screw connection

SIRIUS position switches: complete units

Our position switches can be ordered in a modular design or as complete units – already fitted with an actuator head. You will find further versions, such as compact switches, non-encapsulated designs or switches for ambient temperatures down to -40° at: [siemens.com/industrial-controls/configurators](https://www.siemens.com/industrial-controls/configurators)

Plastic or metal enclosure 31 mm wide, according to EN 50 047, with snap-action contacts 1 NO/1NC

** – with plastic roller

Mechanical safety switches with separate actuators

Safety switches with a separate actuator are used where the position of doors, covers or protective grilles must be monitored for safety reasons. 3SE5 safety switches with a separate actuator without a locking device have the same enclosures as the 3SE5 position switches (modular system).

Safety switches with a locking device are special safety-related devices which prevent an unforeseen or intentional opening of protective doors, protective grilles or other covers for as long as a dangerous situation is present (i.e. follow-on motion of the switched-off machine).

Safety switch with separate actuator, 5 approach directions, without locking device

Order number, plastic	Order number, metal	Enclosure/contact
3SE5232-ORV40	3SE5212-ORV40	31 mm / 1NC+1NO
3SE5232-OQV40	3SE5212-OQV40	31 mm / 2NC+1NO

SIRIUS 3SE6

non-contact safety switches

RFID 3SE63 non-contact safety switches and 3SE66/67 magnetically operated switches comply with the highest SIL 3 or Cat. 4 safety requirements for monitoring the positions of movable protective devices. The switch must be connected to a safety relay, e.g. SIRIUS 3SK1/3SK2, or a bus system, e.g. SIMATIC ET 200SP, for evaluation.

Rectangular safety switches 25 mm x 91 mm

Non-contact RFID safety switches

An RFID safety switch consists of a coded RFID switch with an 8-pole M12 connection plug and an identical RFID actuator.

Order number	Description
RFID safety switch	
3SE6315-0BB01	Family coded
3SE6315-0BB02	Individually coded, multiple teach-in capability
Actuator	
3SE6310-0BC01	Standard
Connection cable	
3SX5601-2GA05	5 m, M12 socket, 8-pole

Rectangular safety switch, large 25 mm x 88 mm or small 25 mm x 33 mm

Non-contact magnetically operated safety switch

A magnetically operated switch comprises a coded switching magnet and an identical contact block (sensor unit). The switches use reed contacts as mechanical contacts.

Order number	Description
Magnetically operated switch, contact block 25x88 mm	
3SE6604-2BA	With cable 3 m, 1NO+1NC
3SE6604-2BA01	With M8 plug, 4-pole, 1NO+1NC
Actuator, switching magnet (coded), 25 x 88 mm	
3SE6704-2BA	
Magnetically operated switch, contact block 25x33 mm	
3SE6605-3BA	With cable 3 m, 1NO+1NC
Actuator, switching magnet (coded), 25 x 33 mm	
3SE6704-3BA	
Connection cable	
3SX5601-3GA05	5 m, M8 socket, 4-pole

Security information

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept. For additional information on industrial security measures that may be implemented, please visit siemens.com/industrialsecurity
